Compilation date: **17/01/2020**

Version number: **01/2020**

## COMPOSITION/INFORMATION ON INGREDIENTS

The complete list of ingredients is indicated on the single product packs in compliance with the provisions of Art. 19 of Regulation (EC) 1223/2009.

INGREDIENTS	MAXIMUM CONCENTRATION (% WEIGHT/WEIGHT)
AQUA	[40%–45%]
ALCOHOL DENAT.	[38%–43%]
BENZYL ALCOHOL	[6%–12%]
PEG-40 HYDROGENATED CASTOR OIL	[3%–6%]
DISODIUM COCOPOLYGLUCOSE CITRATE	[2%–5%]
BISABOLOL	[0.1%–0.3%]
PARFUM	[0.15%–0.3%]

## IDENTIFICATION OF RISKS/INFORMATION FROM THE MANUFACTURER

**Health warnings:** May be irritant in contact with the eyes. Avoid contact with the eyes. In case of contact, wash the eyes immediately with abundant water. If ingested may cause slight irritation to the gastrointestinal tract.

- Carefully follow the instructions provided on packs or on the attached product information leaflet/wrapper/tag.
- Avoid all uses not indicated in the instructions.
- Do not mix with other products or with similar products or with other substances not indicated in the specific instructions.
- For optimal product use, first remove dye from the hair using only water. Then rub the areas of skin affected with a light massage until the skin is completely clean, and finally rinse.
- Keep the product out of reach of children.
- For external use.

**Products for professional use only, intended for application to the skin**

## FIRST AID MEASURES

**Contact with eyes:** Remove contact lenses if worn and rinse thoroughly with abundant water. In case of persistent irritation seek medical assistance.

**Ingestion:** In case of ingestion of significant quantities of the product, consult the nearest poison information centre. Do not induce vomiting.

## FIRE PREVENTION

**Flammability:** The product is not flammable. In case of fire, extinguish with water or a fire extinguisher, and avoid breathing in smoke and vapours.

---

#### PROCEDURES IN CASE OF ACCIDENTAL LEAKS OR SPILLAGES

**Leaks or spillages:** n/a  
**Personal protection:** n/a

---

#### HANDLING AND STORAGE

**General precautions**

Carefully follow the instructions provided on packs. Do not mix with other products or substances unless indicated in the instructions. Continuous exposure to detergent products (soap, shampoos, liquid detergents) for professional reasons may cause deterioration of the natural moisturizing factor and the stratum corneum, which form the natural protective barrier of the skin. Deterioration of this barrier could cause lesions to the skin, which would therefore be more exposed to the action of external agents.

In these conditions, handling other products normally used in the course of professional activities without using the necessary precautions may give rise to phenomena of intolerance, which over the long term could develop into more serious forms.

**Optimal conditions of storage:** Store in a dry and well-ventilated place, at a temperature of no less than 5°C and away from naked flames, heat sources and functioning electrical appliances.

---

#### PERSONAL PROTECTION/LIMITATION OF EXPOSURE

The work environment must be adequately ventilated, using mechanical ventilation equipment if necessary (Title II, Legislative Decree 81/2008 and subsequent amendments).

If the employer identifies risks that cannot be avoided with other means, workers must be provided with suitable Personal Protective Equipment (PPE) (Arts. 77 and 75, Legislative Decree 81/2008 and subsequent amendments).

PPE must comply with the provisions of Legislative Decree 475/92 (Art. 76, Legislative Decree 81/2008 and subsequent amendments).

It is compulsory to use the PPE provided by the employer (Art. 20, Section 2 and Art. 78, Legislative Decree 81/2008 and subsequent amendments).

---

#### ENVIRONMENTAL PROTECTION

The work environment must be adequately ventilated, using mechanical ventilation equipment if necessary. Points at which emissions of steam, gas, dust or other substances may occur must be located in specific areas equipped with local extraction or collection systems. (Title II, Legislative Decree 81/2008).

---

#### PHYSICAL AND CHEMICAL PROPERTIES

**Appearance:** Moistened wipes

**Smell:** Characteristic

**pH:** 7.0–8.0

---

#### STABILITY AND REACTIVITY

The product is stable at ambient temperature.

---

#### INFORMATION ON DISPOSAL

The reference standard applicable to the disposal of cosmetic products is Part 4 of Legislative Decree 152/2006 (Environmental Code) and subsequent amendments.

Non-hazardous wastes from skilled trade activities (in the case of hairdressing salons this means empty used bottles and other containers) may be disposed of as municipal wastes if the municipality in question has implemented the provisions of Art. 198, Legislative Decree 152/2006 (Environmental Code), which lists the waste disposal responsibilities of municipalities.

Pursuant to Part 3, Section II, Titles III and IV of Legislative Decree 152/2006 regarding the protection of water resources, and pursuant to regional regulations, professional hairdressing activities are classified as being equivalent to civil residences that produce analogous domestic water wastes for discharge into the public wastewater system, on condition that they comply with the regulations established by the local authorities (e.g. municipalities and consortia) that manage the public wastewater system.

---

#### **INFORMATION ON REGULATORY STANDARDS**

Finished cosmetic products are manufactured and sold in compliance with Regulation (EC) 1223/2009 and subsequent amendments.

Finished cosmetic products are specifically excluded from the field of application of European Union legislation regarding hazardous substances and mixtures (Regulation (EC) 1272/2008). They are also excluded from the requirements of Title IV of Regulation (EC) 1907/2006.

If the Risk Assessment Document (Art. 28, Legislative Decree 81/2008) indicates the need to establish a health monitoring programme, the employer must appoint a medical specialist (Art. 18, Section 1, Point a) to monitor workers with the pre-employment and periodic examinations required by law (Art. 41, Legislative Decree 81/2008).

Workers are obliged to participate in the health monitoring programme implemented by the medical specialist (Arts. 20 and 78, Legislative Decree 81/2008).
